

Anchorage Airport Update
March 2019

- 1. ANC North/South Runway Renewal Project:** Project involves rehabilitating and widening RW 15/33 (the north/south runway), and updating taxiway geometry to meet FAA standards. Construction is planned for 7 days per week, 24 hours per day, April through October. During construction, the majority of air traffic will be shifted to the east/west runways. Most arrivals will land from the west, and most departures will take off to the east, creating a temporary increase in air traffic and noise over the city. To stay up to date on the project and submit comments, visit the website at anc15-33.com.
