MOA - Parks and Recreation Projects - Please select three that are most important to you. You can add a new project at the end where it says "Other" or you can provide comments in the following question. Some projects include an estimated cost and whether any funds are currently available; for other projects there is no cost information. NOTE - the number to the left of each project is the priority ranking it received last year by RCCC members (some projects were tied). The Parks & Recreation projects are listed here in the order of that priority.

Recreational corridor along Rabbit Creek Rd. Also a Recreational corridor from Old Seward to the Potter Creek Trailhead.

State of Alaska Projects - Please select three that are most important to you. You can add another project where it says "Other" or you can comments in the following question. Some projects include an estimated cost and whether any funds are currently available; for other projects there is no cost information. NOTE - the number to the left of each project is the priority ranking it received last year by RCCC members (some projects were tied). The State projects are listed here in the order of that priority.

Old Seward Highway from Potter Marsh to Rabbit Creek Road should be done as a slow-speed road compatible with the wildlife refuge and non-motorized recreation. 25 mph would be a safe speed. It should not be built as a high-speed bypass of the Seward Highway.

Thanks. This short section of pavement is between newer pavement on the start (south end) of the onramp, and the main section of onramp (north of it), which is also newer. Both the newer sections of pavement are in good condition. But the short older section between them gets multiple potholes every year-- often 4 inches deep with vertical edges-- i.e., dangerous. The state patches the potholes, after complaints-- but now, after years of patching, much of the "pavement" is actually overlapping patches.

MOA General Projects (not including the prior parks and rec projects.) - Please select three that are most important to you. You can add another project where it says "Other" or you can add comments in the following question. Some projects include an estimated cost and whether any funds are currently available; for other projects there is no cost information. NOTE - the number to the left of each project is the priority ranking it received last year by RCCC members (some projects were tied). The Parks & Recreation projects are listed here in the order of that priority.

The fire safety connections should be small-scale for emergency use: NOT major new roads into undeveloped private lands that will spur development and overload lower Hillside intersections with more traffic.

Culvert on North side of rabbit creek on golden view is really bad this year.

That's it! Thank you for completing the survey.
