### **Airport Heights Community Council**

August 1, 2011

Christine Chestnut

Municipality of Anchorage

Capital Improvement Projects

Dear Christine,

On behalf of the residents of the Airport Heights Community Council area, thank you for the opportunity to provide input on capital improvement projects for our area. After consultation with area residents, we are pleased to provide the information found in this packet. Attached you will find the priority ranking for the CIP projects found on the master list spreadsheet provided by the Municipality. Additionally, we have recommendations for additions and deletions (described on attachment and listed on the additions/deletions sheet provided).

A primary concern for residents in our area is pedestrian safety, including safe walking paths with adequate access and lighting for both adults and children, many of whom walk to school each day (both Airport Heights Elementary School and East High School). For this and other reasons, traffic calming is our top 2012 priority.

A second associated issue of concern is the health of area residents, including access to recreational facilities for individuals and families. These projects are viewed as community investments as they are likely to improve health status for residents in our area as well as other Anchorage residents who use the Chester Creek green belt for recreation.

We look forward to working with your office to complete the capital improvements list for our area. We welcome MOA departments to present their proposed projects to our council members at our meetings the third Thursday of each month from September through May. Please contact me to be added to the agenda.

Please feel free to contact us with any questions.

Sincerely,

**Becky Kurtz** 

President

#### **ADDITIONS**

#### Airport Heights Traffic Calming (#1 Priority for 2012)

The number one priority for our area is not found on the spreadsheet provided, but was included in our CIP submission in 2010. The project is broadly titled "Airport Heights Traffic Calming Improvements." As described in 2010-

Problem: Many of the roads in Airport Heights are long and straight. As a result, vehicles often travel above the speed limit causing safety issues for children and pedestrians.

Scope: This project will construct traffic calming measures to reduce traffic speed and improve vehicle and pedestrian safety concerns.

Status: In 2009 the following traffic calming improvements were completed-

- 1. 16<sup>th</sup> Ave. medians west of Alder Street
- 2. Traffic circle at 16<sup>th</sup> Ave. and Birchwood Street
- 3. Gateway treatment at Lake Otis Parkway and 16<sup>th</sup> Ave.
- 4. Speed humps installed on Norene Street.

Desired CIP Improvement: Complete remaining traffic calming measures, including additional speed humps and /or reconstruction of existing speed humps on 20<sup>th</sup> Ave. and Sunrise Drive. The curve at Sunrise Drive and 16<sup>th</sup> and 18<sup>th</sup> Avenues is of high concern to area residents because vehicle accidents have occurred in this area as speeders attempt to negotiate this curve.

#### Sitka Park Improvements (#6 Priority for 2012)

This priority is also supported by the Fairview Community Council and includes trail improvements, safety improvements and access improvements.

Problem: Sitka Park is a highly used and valued park, but access is limited and dangerous in some areas and trails are in a state of disrepair.

Scope: This project will provide needed safety, access and trail improvements.

Status: Projects were submitted in 2011 CIP submission. No work has been completed.

Desired CIP Improvement: The desired improvements include, improved access from Orca Street to Sitka Park (Fairview Community Council area) because the existing paved pathway from 15th and Orca to Sitka Park is experiencing significant degradation of paving creating a safety hazard. Rehabilitation is warranted. Project includes improvements to bridge across park wetlands.

Also desired is improved access from Sitka Park to Maplewood Street (Rogers Park Community Council) and replacement of bridges on the multi-use trail.

#### **DELETIONS**

The attached spreadsheet shows two categories of deletions, those projects which have been or are in the process of being completed and those that did not receive support from area residents. Those that have been completed are labeled as done and those that are not supported are labeled as deleted.

The projects recommended for deletion include:

- 1. 16<sup>th</sup> Ave. Pedestrian Improvements Lake Otis Parkway to Sunrise Drive
- 2. Airport Heights Elementary School Walkway Connector-Condos to 16<sup>th</sup> Ave.
- 3. Bragaw Street at Reka Drive Pedestrian Crossing Improvements
- 4. Lake Otis Parkway Extension-Debarr Road to Airport Heights Drive
- 5. Glenn Highway at Airport Heights Drive Interchange
- 6. Seward Highway to Glenn Highway Connection (H2H)-Bragaw Street to Tudor Road

Items 1,2 and 3 are recommended for deletion because there are other projects that are a higher priority for pedestrian safety and for children walking to school. These projects are not seen as important needs for our area at this time.

Items 4,5,6 and recommended for deletion because they are or appear to be part of the discussed Highway to Highway (H2H) extension or would implement aspects of that solution that we found unacceptable. The Airport Heights Community Council passed a resolution opposing the 15<sup>th</sup> Avenue Alernate Route for the H2H project. There is strong opposition to this project for very cogent reasons as expressed in the resolution available on our website at http://www.communitycouncils.org/download/4304.pdf.

#### **ADDITONAL COMMENTS**

15<sup>TH</sup> Ave. at Sitka St Pedestrian Crossing Improvements (Page 1, # 1 on master list provided, #10 Priority for 2012)

There is concern not only about pedestrian safety, but driver safety. There are only two access points into/out of Eastridge (Sitka and 15<sup>th</sup> and 20<sup>th</sup> and Lake Otis), and both entrances are hazardous for vehicles. Any work completed for pedestrian safety should also include improvements that make access to Eastridge safer.

This highway safety improvement project was discussed in 2010 and it was found that this project is complex (email from traffic engineer copied below). We recommend further consideration of this project, regardless of its complexity, before an area resident is injured or further, more serious accidents occur.

Subject: Highway Safety Improvement Program Project: 15th Avenue at Sitka Street -- UPDATE

All -

Upon further scoping, this project has been found to involve complex project development issues such as impacts to recreational (4(f)) properties, wetlands, and requires the acquisition of airport property. These issues will result in a significant delay and additional costs that were not anticipated when the project was nominated under the Highway Safety Improvement Program (HSIP).

The primary tenet of the Department's Highway Safety Improvement Program is to implement cost effective mitigation which reduces crashes and can be delivered quickly.

The Department will forward the Municipality of Anchorage the HSIP nomination package along with our findings for their consideration to include in a future AMATS project.

Please share this update with your council members.

M. Anne Brooks P.E. Brooks & Associates 301 West Northern Lights Blvd, Suite 440 Anchorage, AK 99503 E-mail: a.brooks@brooks-alaska.com
