September 12, 2019

To: Anchorage Assembly

From: H. “Ky” Holland, Co-Chair

The Rabbit Creek Community Council met on September 12th to consider the pending development of an Anchorage stormwater utility. We did not take up the question of support for a stormwater utility on its own merits though we did discuss some of the issues that have affected our area and the diversity of development and current drainage infrastructure.

Further, Rabbit Creek Community Council supports the Resolution no. AR 2019-318 proposed by Assembly members LaFrance and Weddleton to limit the next steps in the process of developing a stormwater utility to a rate study with a maximum budget of $100,000.

Further, the scope of work of this rate study should consider how money currently being spent on drainage and storm water management by LRSAs, AWWU, and other entities will be integrated into the financing of the storm water utility.

Passed - 18 yes, 0 no, 0 abstention

Respectfully,

H. Ky Holland
Co Chair
