- Committee reports:
  - Northwood Extension
  - Gravel Pits/Kincaid
  - Strawberry Road Project- this committee may be introducing a resolution tonight
- Open for New Business
- Close

I had the pleasure of meeting with a few DOT employees regarding the project of the WELCOME TO SAND LAKE sign. We are drafting up designs and dimensions to present to all the entities so that we may move forward on this project. Exciting! Will keep us all posted!

In our last meeting we had the privilege of having a very comfortable time hearing our Representative Norm Rokeberg share with us at length on many issues. We all had a chance to ask him so many questions. It was refreshing as this was the most difficult session in our teleconferences with our legislators. Thank you Representative Norm Rokeberg!

Our last meeting was one with many new faces! Many neighbors were gathered together with big concerns regarding a cell tower wanting to be placed in the Mc Gill Street area. Mr. Nardini presented himself very professionally and took back to his bosses our concerns.

On June 26, One big dream came true in my life as well as the life of many others. Our project at Jade Field Park (mainly the concession/scorekeeper building and fields) is completed and what a day it was! There are not enough words to express the gratitude to ALL who made this park the NICEST facility in our city! Thank you to the current board of directors of Dimond West Little League for allowing us who began to connect with those who finished this beautiful project. A must go see!

I don't usually express myself personally regarding issues that come before the council. But I am taking the liberty to do so now. I am very concerned over an email I received from the Sand Lake PTA. I really feel like possibly the designers of the Strawberry Road intersection/light are causing a wedge to come in between us as a community. All stakeholders should be at the same meeting hearing the same thing and this is NOT happening. Everyone is concerned about the safety of our children...and many of us are concerned that having a light at the intersection was a \$500,000 project is now a 2.1 MILLION dollar project. I have concerns with this...especially when the powers that be try to justify their spending on a NEW plan! We all need to be at this table to talk. I hope this happens. SOMEBODY HEAR ME!

Thank you to Betty for taking the position as our FCC secretary/office manager....no easy task!! Thank you Betty and welcome aboard!

I have received a notice that the parks in our area that are up for some bond money to be spent on them may be happening very soon. I believe 2 years ago we were at this same place and things were put on hold for I don't know reasons.  
Delong Lake a dock, Linden Park a walkway, Gladys Wood Park  
I will keep us updated on their progress.

The Flowers at the 4 corners looks just BEAUTIFUL! Thank you to all the volunteers.

Our Leaders of our AWARE neighborhood group met for dinner and discussion and are ready to continue to keep all our neighbors informed with literature and a block party. Being ready for disaster is critical! This is an exciting time with our neighbors and we are becoming more and more AWARE....Ready for disaster as a neighborhood!  
This is such a powerful opportunity for many reasons. Are you ready to be a leader in your neighborhood? Please call and we can direct your call to Steve Beardsley with the MUNI and we can help Steve and you get started!
