The Municipality of Anchorage, Department of Project Management & Engineering, has contracted with CRW Engineering Group, LLC to improve Turnagain Street and Turnagain Boulevard. The improvements are expected to include a new road foundation, asphalt pavement, a piped drainage system, pedestrian/bicycle facilities, and street lighting. It is anticipated that construction of the project will be phased, with Turnagain Boulevard (Phase I) being started as early as 2017, while Turnagain Street (Phase II) may remain several years out. No funding for construction has yet been received for either phase.

The project is currently in the design study phase and we have recently published a Draft Design Study Report (DSR). It can be viewed and downloaded for review and comment on the project website.

Please join us on Wednesday, January 13 at Open House #3 to discuss the Draft DSR.

OPEN HOUSE #3

Wednesday, January 13
6:00 PM — 8:00 PM
