

A COMMUNITY COUNCIL RESOLUTION  
SUPPORTING  
AN ANCHORAGE CITIZEN'S GROUP  
RECOMMENDED CHANGES TO MOA  
ORDINANCE 21.05.040-21.14.040

Whereas, MOA Ordinance 21.05.040-21.14.040 concern the type and location of cellphone towers within the boundaries of the Municipality of Anchorage (MOA);

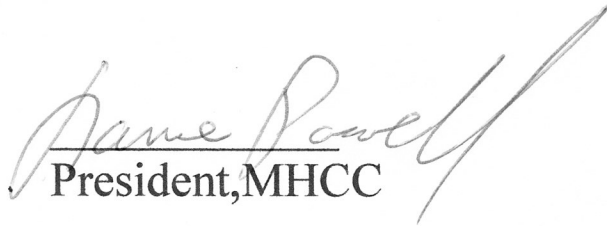

Whereas, in all of Anchorage areas, especially residential areas, it is the desire to see cellphone service providers use the most current technology and work together to provide the minimum number of cellphone towers that are not tall enough to be disruptive of the residential view shed and through having multiple cellphone service companies cooperate with each other so that their facilities occupy space on the same structure (co-location);

Whereas, it is desired that this installation of cellphone service antenna structures will affect minimally the view sheds of Anchorage, especially residential areas;

NOW THEREFORE, let it be resolved that the Mid-Hillside Community Council (MHCC) approves the Anchorage citizen's group recommended changes to Title 21.05.040-21.14.040 as presented to MOA's Planning and Zoning Commission.

PASSED AND APPROVED by Mid-Hillside Community  
Council this 29th day of January, 2016.

Respectfully,

  
President, MHCC
