

Abbott Loop Community Council

2025-04 **DRAFT** RESOLUTION-Coventry Stormdrain Improvements

Abbott Loop Community Council Resolution in support of amending the 2026 CIP to move forward budgeted construction costs for Coventry Drive Area Storm Drain Improvements by four years.

WHEREAS, a presentation was made at the August 31st, 2023 meeting hosted on Zoom and in person and a petition was emailed on September 27, 2023 to the Abbott Loop Community Council Officers, regarding stormwater drainage issues in the Coventry Dr. area that affect multiple residences year-round with flooding hazards; and

WHEREAS, after communication with Anchorage Assembly members, it was noted that supporting this prioritization of the Coventry Dr Area Storm Drain Improvements won't affect ALCC's current priority list or be in any direct competition with the current selected priorities ALCC submitted into the 2025 CIP because, the project is slated to be included in the CIP for 2030; and

WHEREAS, planning and surveying for this project has been completed in the summer of 2025; and moving this project ahead by four years would sooner diminish the repeated flooding to affected homeowners in the area and would directly eliminate continued flood damage costs that have been borne by the Abbott Loop residents who have resided on Coventry Drive for about 50 years.

NOW, therefore, be resolved, that the Abbott Loop Community Council supports amending the 2026 CIP to include the Coventry Drive Area Storm Drain Improvements project in the 2026 CIP.
