8:10PM Presentation by Anne Brooks on the Sand Lake /Jodhpur Road project - with an update on the Kincaid road project extension.

8:30PM Cindy Stanton reporting
FCC Robert Hayes reporting
Committee Updates
Announcements

Coming in June will be the opportunity to meet the candidates who will be running for state house.

I want to thank all of you who took your time to email the council with your concerns/needs for our community. I faxed our legislators with our needs.

The Muni cancelled the CIP meeting. We will also be going over these needs with executive board and present to city and state officials.

I want to let our community know that one of our residents Mr. John Lilly faithfully sends in \$20.00 for our council every year ... but most importantly, he writes a letter saying he cannot attend meetings because he works the swing shift, yet he shares his gratitude to the council members for serving, and he thanks us all for working hard as council members. I just want to publicly say thank you John. It is so encouraging to all of us getting a letter of gratitude.

Our legislators are hopeful to bring home some monies for different projects in our community.

Thank-you Senator Ben, Rep. Norm Rokeberg and Rep. Lesil McGuire.

National Veterans Wheelchair races are coming! Need volunteers! Call 276-5550 - email wheelchairgames@alaskadestinations.com

We are having another tri-council meeting May 16, 7 PM, at the Bayshore club house. Bayshore, Old Seward and Sand Lake Community Councils are hosting British Petroleum. BP will be giving a presentation on many facets of the industry, including the taxes. There will be a question/answer time. Please plan on attending - bring your hard questions! :)

Kincaid Park Access Road - Project Update April 2006

The design for the Kincaid Park Access Road improvement project is almost complete! The construction project will improve the existing roadway from the Nordic Ski Club Bunker to the Kincaid Park Entrance. Minimal lighting will also added along the alignment. These improvements will lower maintenance costs and improve roadway safety.

The project team received excellent public input at the open house on February 28. These public comments have been helped designers fine tune the design. The final design incorporates many traffic calming elements requested such as - keeping the rolling, curving alignment of the existing road for a park-like setting, minimizing the clearing of trees close to the road, adding a median, crosswalk and landscaping at the Raspberry parking lot, adding voluntary speed compliance signs (like permanent "Smart Carts") that will let motorists know when their speed exceeds the 25 mph posted speed, and transplanting trees to the edge of the roadway where currently there are no trees. Raspberry Parking lot and the parking areas near the road to the World Cup start will also be improved.

The project design has received final approval from the Parks and Recreation Commission. The Kincaid Park Road project was funded with a legislative appropriation. Construction, scheduled to begin in August 2006, is contingent upon receiving the remaining funds from the legislature.

For more information contact: Anne Brooks, P.E., Public Involvement Coordinator at 272-1877.

HAPPY MOTHERS DAY!

:)
