

**Resolution
of the
Basher Community Council**

**Regarding
LRSA request for Community Council Contact Information**

Background: The LRSA Board of Directors has lacked effectiveness in contacting the neighbors of the community when time is of the essence. They have requested that the contact information obtained from the community members at council meetings be shared with them for the exclusive use of LRSA notifications and or LRSA business. As this is in conflict with the FCC rules, an exception is requested.

Resolution:

Whereas, the LRSA should have the ability to contact the members of the community in a manner most expeditious to the community members regarding road projects, meetings, LRSA business, or the condition of the roads;

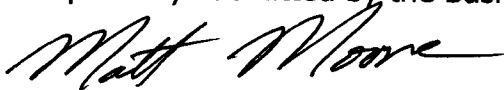

Therefore be it Resolved,

That the Basher Community Council provide a copy of the Basher Community Members contact information to a LRSA member.

That a LRSA member have access to the most recent Community Council sign in sheets in order to update their contact data base.

That the LRSA be bound by the same rules as the Basher Community Council by the Federation of Community Councils.

Respectfully submitted by the Basher Community Council.

Matt Moore, President
Basher Community Council
