

## 2019 Runway Construction Update

**2019 Construction**

The Ted Stevens Anchorage International Airport (ANC) North/South Runway Renewal project is about to begin the final phase of construction. The magnitude of this construction effort will require a full runway closure April through October, allowing construction to occur 7 days per week, 24 hours per day. During construction, air traffic will be shifted to the East/West Runways. Most arrivals will land from the west, and most departures will take off to the east, creating a temporary increase in air traffic and noise over the city. Airport operations and noise levels will return to normal upon completion of the project. We appreciate your patience and understanding as we complete the final phase of construction.

As the main runway at ANC, the North/South Runway is critical infrastructure for Alaska air travel and for supporting the 5th-busiest cargo airport in the world. The ANC North/South Runway Renewal project is improving airport efficiency and safety by replacing the aging pavement and widening the runway to comply with new design standards needed to accommodate the largest cargo airplanes in the world.
