

# 4th Avenue Signals and Lighting Upgrade

## E Street to A Street

As part of the Municipality of Anchorage's long-term goal to upgrade the street lights and traffic signals throughout downtown, 4th Avenue between E Street and A Street is getting a make-over!

### Planned improvements include:

- New traffic signals and lighting systems. The new light poles will have banner and flower basket supports!
- New sidewalks to meet ADA requirements.
- Curb bulbs at intersections, where possible.
- New pavement.
- Tree planters with curbing.
- 1% for art

Construction is planned to begin July 2021. The project team recognizes that construction is disruptive and with input from the downtown community, we are developing strategies to minimize the impacts, such as:

- Identifying and promoting alternative parking locations
- Constructing the sidewalk improvements block by block instead of all at once
- Providing flaggers for pedestrians and signage to let customers know you are open
- Restricting the hours the contractor works to minimize disruption
- **What ideas do you have?**

*We want to hear from you!*

We'd like to know more about your business operations to help us minimize impacts.

If you'd like to meet one-on-one with the project team, they have set aside times on February 25 & 26. To sign up, go to the project website at [www.ancdowntownlights.com](http://www.ancdowntownlights.com).

## 4th Avenue Signals and Lighting Upgrade

### E Street to A Street

*Did you know* most of the signals and lights downtown

are at least 40 years old!??? Maintaining these systems is expensive, and some of the signals are so old they wouldn't be able to be replaced if they were damaged. Upgrading the signals and lights downtown will decrease maintenance costs and improve lighting levels.
