

White Spruce Seedling Potting & Native Plant Nursery Build-Out Volunteer Event

Saturday, May 27

12:00 – 4:00pm

Location: Government Hill Commons, 801 Erickson Street, Anchorage AK

Description: Anchorage Soil and Water Conservation District will be building a small native plant nursery at the Government Hill Commons this spring and early summer! On May 27 we plan to build at least one capillary bed for growing wetland plant species to be used in ecological restoration projects in Alaska.

The Anchorage Audubon Society is donating 100 free white spruce seedlings to Anchorage Soil and Water Conservation District. We are requesting volunteer help to pot these into 1-gallon pots.

Volunteers will get white spruce seedlings to take home!
