

Daniel,

I don't have any major updates, but here's a quick summary of recent activities from the AFD Wildfire Division:

- The CWPP stakeholder group recently held its second meeting, and the process is progressing on schedule.
- The invitation to bid for the Campbell Airstrip Road project has been submitted to the municipality for review.
- The Far North Bicentennial Park User Group Trails Committee was briefed on the fuels project, with no significant concerns raised.
- We're planning to host a CWPP and wildfire preparedness town hall this spring for the public (date and location to be determined).
- The AFD Wildfire Division was invited to present at an Assembly Work Session on wildfire risk and mitigation efforts within the municipality last week. ([Work Session](#))

Let me know if you have any questions or need additional information.

Best regards,

Jon
