

2020 RCCC Resiliency Committee Goals

December 12, 2019 Updated 12/16/19

Primary Community Project Goals

1. Plan and implement **2020 Resilience (Firewise awareness) programming**, build on 2019 RCCC events and communications with MOA FW forester in coordination with HALO, FEMA, NFPA, All State, SOA Forestry and MOA agencies. (January mailing, March/April awareness and RSG prep with HaLO, April/May mitigation, chipper day and drill.) (Review existing resources and gaps.)
2. Plan and hold a **wildfire table top drill** with the MOA OEM staff and FW with case/drill materials that can be moved out to HOA, N'd Watch and Emergency Watch programs in coop with agencies for citizen drills as part of RSG. (Optional - find a willing HOA to host a pilot program.)
3. Investigate and increase N'd Watch and previous emergency watch program as strategy to **organize isolated residential areas** and increase their all hazard respond capability and seek pilot areas to organize with APD N'd/Crime Watch coordinator.
3. Pursue **FireWise Site designation** for the RCCC with FW

Community Advocacy Initiatives

1. Establish **ROW standards** and **locations (John has)** with AFD Forester and MOA ROW manager to improve egress and reduce hazards and act as shaded fire breaks along critical routes and defense lines including utilities (CEA), LRSA/Roads, and private property owners.
2. Support the planning and **funding to develop missing road connections** and emergency egress/access routes.
3. Seek funding to **expand access to wood lots** and reduce the costs to encourage more fire load reduction.
4. **Improve and share emergency communication procedures** with MOA OEM Staff - MOA
5. Outreach, engagement and recognition of **volunteers assisting with hazard reduction** projects organized by Firewise and community resiliency including Team Rubicon, Trail Watch, and Boy Scouts.
6. Monitor and advocate for **technology development** work that FW is piloting and funding including the wildfire detection camera testing.
7. Wildfire **hazard mitigation data** server, data updates, fire break locations, mitigation plan updates. (UAA, FW...). (FEMA GIS project funding.)

Resiliency Timeline
