Earthquake Assistance & Other Resources:

The Turnagain Community Council compiled a list of resources in regards to the earthquake that they shared with the TCC and others. The list was created when many TCC members provided resource information after the November 30, 2018, 7.0 Earthquake that hit our community. From the council: "While this, in no way, is meant to represent a comprehensive resource list, we hope the below information can help keep you updated, and is useful to anyone who is in need of assistance to cope with both physical and emotional damage from this major natural event."

- **To find out what you can do to stay safe during and after the next earthquake:**
