

SATURDAY, JULY 28 BIRD CHERRY SMACK-DOWN

Clearing Bird Cherry in Valley of the Moon Park

Let's transform Valley of the Moon Park and clear it of this invasive species that blocks visibility from the trail. We will be trimming only the overgrown trees along the edge of the wooded section on the park along 16th avenue and the Chester Creek trail. Everyone that is able to help is welcome! If you are strong we will need help pulling the smaller trees from their roots. Help create the foundation for restoring native habitat and finding a sustainable use for this urban forest. A useful way to spend part of your summer Saturday. RVSP if you can with contact info below or on Next Door.
