19:17:00 From hans : nevermind
19:17:05 From Veronica Slajer : Thank you, Portia, for your report, also.
19:31:54 From Cathleen Hahn, SACC Treasurer : Find the SACC CIP list here: <https://www.muni.org/communitycouncilsurveys/homepage/>
19:36:23 From Harry Need : Harry Need – 14th & F
19:38:44 From Mercedes Colbert – Sen. Begich : Mercedes.Colbert@akleg.gov, Sen.Tom.Begich@akleg.gov
19:40:43 From Linda Swarner : Linda Swarner--1200 I St
19:41:58 From Trish O'Gorman/Jay Holtan : Patricia O'Gorman

19:42:07 From Trish O'Gorman/Jay Holtan : 1112 P Street
19:44:23 From Tom Begich : Tom Begich 1529 E Street
19:51:39 From Lois Epstein : Paul - Are you including as greenspace the parking lot landscaping? Those spaces are not usable by students or neighborhood residents. Thanks.
19:55:51 From Harry Need : May I please suggest that these types of questions are best submitted and answered on the website provided?
19:57:56 From Lois Epstein : Mr. Need - My question can receive a quick answer from Mr. Baril. Thanks.
19:58:04 From hans : Same
20:01:34 From Deborah Hansen : Can you please give the citation for the ASD requirement that the parking lot fit assembly attendance.
20:06:06 From Paul Baril - Nvision Architecture : Hello Lois, to answer your question, the total square footage numbers that we have presented includes all landscaping areas (includes parking landscaping) for both the existing school site and the replacement school site so it is an apples to apples comparison. The existing school site has a total of 169,000 square feet of greenspace and the replacement school site has a total of 173,600 square feet.
20:12:22 From Paul Baril - Nvision Architecture : Hello Deborah, to clarify what I was saying with our update is that ASD doesn't feel comfortable with reducing the parking capacity below the zoning code required minimum. This is because the parking is needed during school assembly events and after school community activity events that take place at the school. The parking lot capacity is not for what is required during the school day because parents are not parking at the school while their kids are at school learning.
20:15:07 From Deborah Hansen : Martin and Deborah Hansen yes
20:18:40 From Paul Baril - Nvision Architecture : Thank you everyone for all the input on the IVES Replacement project. I am going to log off now. If there are any additional questions or concerns about the project, please submit them on the project website:
